## Summary

---

I am studying in Computer Engineering(4th) and I expect to graduate in June 2021. I am Machine Learning and Deep Learning enthusiast. I regularly write about Machine Learning- Deep Learning for Analytics Vidhya and Deep Learning Türkiye on Medium. I spend 90 percent of my time learning new algorithms, networks and frameworks. I love reading articles, posts and watching tutorial series. Throughout my study, I developed many applications with different programming languages. Also, I used databases in various for my applications.

## Skills

---

**Languages & Frameworks:** Python, C/C++, C#, JAVA, Tensorflow, Keras, Opencv, .NET, Flask, Django, T-SQL, MongoDB, Mssql, Mysql, Sqlite

**Technical Skills:** Regression, Classification and Clustering Algorithms, Deep Learning Networks, Data Cleaning

## Experience

---

**Intern** – 06/2020-07/2020

Dumlupınar Üniversitesi, Kütahya

- Worked on microprocessors to develop applications.

## Education

---

**Computer Engineering:** Kütahya Dumlupınar Üniversitesi (2016-2021)

## Languages

---

English(Professional)

Turkish(Native)

## Projects

---

- Computer Vision app to prevent traffic jams with Transfer Learning and Yolo.
- Classification and segmentation networks on different datasets in Kaggle.
- Sentiment analysis, news summarization, news classification models.
- Web and desktop applications with different programming languages.
